SKILLS

Languages: HTML, JavaScript, TypeScript, Java, Python, SQL

Frameworks & Libraries: React.js, TypeORM, Node.js, Express.js, NestJS, Fastapi

Technologies & Tools: Aws, Git, Github, Postman, VS code

Databases: MySQL, MongoDB, PostgreSQL

Exploring: Docker, Terraform

WORK EXPERIENCE

Paytm, Noida

Sep 2025 – Present

Software Engineer

- Contributed to Paytm's international e-commerce platform live across Puerto Rico, Costa Rica, and 20+ Caribbean countries, ensuring seamless operations and high scalability.
- Designed, developed, and deployed new features to enhance user experience, improve checkout flows, and support localized payment methods.
- Fixed critical production bugs and optimized frontend modules, significantly reducing downtime and improving platform stability.
- Collaborated with cross-functional teams across geographies to deliver high-impact releases under tight deadlines.

InfoObjects Software (India) Pvt. Ltd., Jaipur

Apr 2024 – Sep 2025

Full Stack Developer

- Designed and deployed serverless functions using AWS Lambda to manage backend logic, enhancing scalability and reducing infrastructure complexity.
- Integrated AWS S3 for secure and efficient file storage, streamlining media handling across multiple projects.
- Improved application performance through image and component lazy loading, reducing load times.
- Introduced agile workflows including sprint planning and daily stand-ups, improving team productivity and sprint completion rates.

EDUCATION

Lovely Professional University

Aug 2020 - Jun 2024

B.E. in Computer Science and Engineering

CGPA: 7.76/10

Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems, Computer Networks, Linux, Data Structures and Algorithms

PROJECTS

VoyagerCX.ai (AI for Banking and Finance): - Client Project

- Contributed as a backend developer to build scalable and secure FastAPI services powering a GenAI-based assistant for financial and regulatory queries using Claude LLM via Amazon Bedrock.
- Developed RESTful APIs for both frontend integration and internal AI workflows, enabling seamless interaction between user interface and multi-agent systems.
- Implemented SMS-based user invitation flows and integrated secure member payment systems to support onboarding and monetization.
- Added robust logging and monitoring mechanisms to improve system observability and simplify debugging for production environments.
- Collaborated with the AI team by designing and exposing APIs for prompt management, real-time inference, and structured data input to support advanced reasoning tasks.
- Technologies Used:** FastAPI, Amazon Bedrock, MySQL, REST APIs, SMS Gateway, Payment Gateway, Logging

Content Management System (CMS)

- Developed a robust Content Management System using Gemini AI, enabling users to seamlessly create, update, and delete posts through an intuitive interface.
- Integrated real-time APIs for direct content publishing to Twitter and LinkedIn, enhancing social media engagement.
- Designed and implemented a scheduled tweets feature, automating content delivery at optimal times to improve reach and engagement.
- Technologies:** React, TailwindCSS, Nest JS, MySQL
